

To Change Raster to ASCII

If you have an IMG file and need to put it out to an ASCII file, you go to DataPrep, Create Surface.

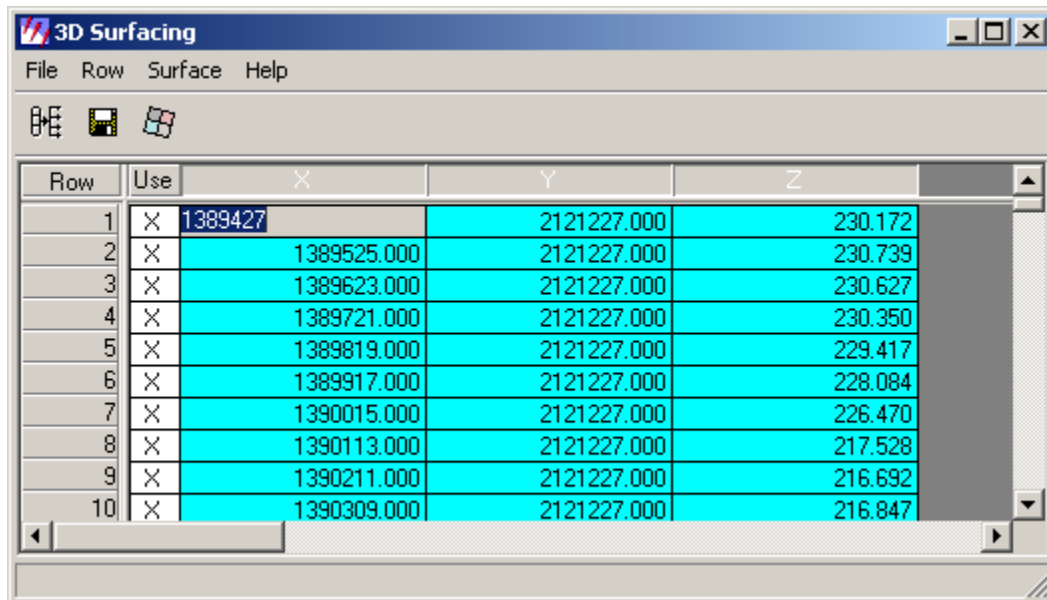

File, Read

Change type to Image file, and load file, OK

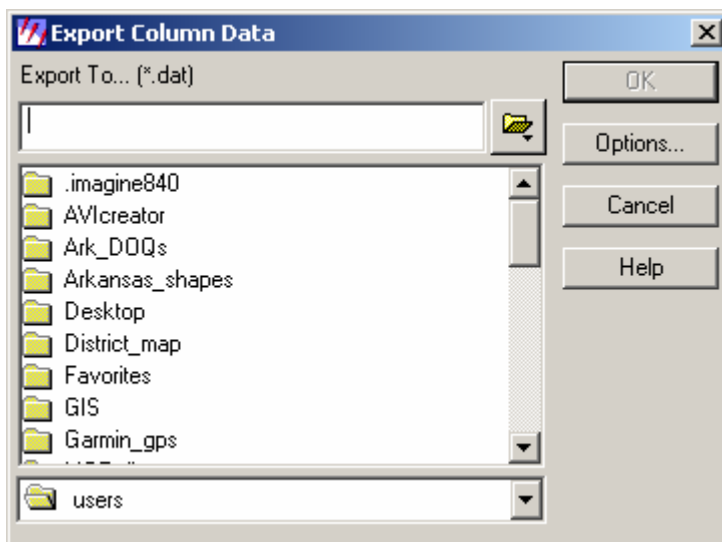

Highlight the Columns you need.

The screenshot shows the '3D Surfacing' application window. It has a menu bar with 'File', 'Row', 'Surface', and 'Help'. Below the menu bar is a toolbar with three icons. The main area contains a table with the following data:
